

Quantum Profile Systems Ltd. (QPSL) is based at Salmon Fields, Royton, Oldham. The company manufactures various products from polyvinyl chloride (pvc) and aluminium for use in the construction industry. The key manufacturing process is extrusion of pvc.

QPSL recognises that its processes and products impact on the environment so is committed to improve its performance through the implementation of an Environmental Management System. This system will provide continual improvement and protection of the environment.

It is the policy of QPSL to take such actions as are relevant and practical in order to protect the Environment. The Environment includes the atmosphere, land, water, people, plants and animals.

We set ourselves environmental objectives and targets to deliver continual improvement in our environmental performance.

**In order to achieve this ambition the company shall:**

---

Have an effective Environmental Management System that implements all policies and procedures associated with environmental and related issues.

Endeavour to minimise any adverse impact on the Environment by giving careful consideration to the total life impact of all materials used.

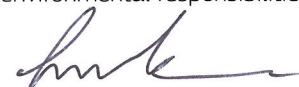

Regularly review and establish environmental objectives and targets for the reduction in the use of energy and resources.

Implement waste reduction and material re-cycling programmes.

Comply with all applicable legal requirements and other requirements to which the organisation subscribes.

Communicate this policy to all personnel, suppliers, customers and neighbours and take into account any concerns from interested parties.

Ensure that all employees are aware of this policy and are trained in their environmental responsibilities.
